11-8316		M8 X 16MM BHSCS [BLACK]	0	EA	76

**All vertical post lengths were chosen based on my height (5'8", 173cm) and reach. You may require more adjustment range based on body type and preferred seating position.**

**Length A:** This is set to minimum length for a 5'8" (173cm) tall human. I encourage using a longer rail than 1270mm to ensure fit. An additional 300mm would provide 12 more inches of cockpit length.

**Length C:** This is set to minimum length for a direct mounted Corbeau FX1 Pro with seat brackets 20.25" (514mm) wide. The FX1 Pro is the narrow version of the FX1. Be mindful of your gear when selecting Part C length.
